PROFESSIONAL SUMMARY

Data Analyst currently working at Viyugaa Technologies, handling healthcare billing data validation and accuracy audits. Prior experience as a Business Analyst Intern, leading a team and delivering data-driven reports and dashboards. Skilled in Excel, SQL, Python, and Power BI, with a strong foundation in data cleaning, analysis, and stakeholder reporting. Passionate about continuous learning and applying analytical skills to solve real-world business problems.

EXPERIENCE

Data Analyst – Medical Billing

Viyugaa Technologies | June 2026 – Present

- Reviewed and validated dental and insurance claim forms against source documents, verifying signature fields, dates, and provider information for accuracy.
- Resolved field-level and page-level discrepancies using a data validation platform, correcting mismatched or missing entries to ensure compliance with billing standards.
- Achieved 98%+ accuracy while auditing and correcting over 1,500 billing forms daily, maintaining productivity targets.

Business Analyst Intern – Team Lead

UptoSkills | March 2026 – June 2026

- Led and mentored a team of 20 members, overseeing task allocation, progress tracking, and project execution to ensure timely delivery of objectives.
- Conducted SWOT analysis and business research to evaluate organizational performance, identify opportunities, and support strategic decision-making.
- Designed and delivered analytical reports and interactive dashboards using Power BI and Excel, providing actionable insights to stakeholders.
- Performed data cleaning, transformation, and exploratory data analysis (EDA) using Python and SQL to uncover trends and support business recommendations.

PROJECTS

Water Potability Prediction using Machine Learning

Python · Pandas · Scikit-learn · Matplotlib · Seaborn

- Developed a machine learning model to predict water potability using water quality parameters, with proper data cleaning and basic data visualization for analysis.

Deep Learning Framework for Breast Cancer Diagnosis

Python · TensorFlow · EfficientNet-B7 · GAN · Grad-CAM

- Designed and implemented a deep learning model for breast cancer classification using GAN based data augmentation and Grad-CAM to enhance model accuracy.

Kongu Transport Management System

MongoDB · Express.js · React.js · Node.js

- Developed a bus transport management system with driver and administrator logins to report, track, and manage bus service issues efficiently.

EDUCATION

Kongu Engineering College, Erode

B.Tech – Artificial Intelligence and Data Science | 2022 – 2026

- CGPA: 7.95 / 10

Mahatma Montessori School, Madurai

Higher Secondary Certificate | 2021 – 2022

- Percentage: 93.16

SKILLS

Programming & Query Languages: Python, SQL.

Tools and Technologies: Power BI, Tableau, Microsoft Excel, MySQL, GitHub.

Web Development: HTML, CSS, JavaScript, React.js, MongoDB.

Soft Skills: Analytical Thinking, Communication, Leadership, Problem Solving, Adaptability, Time Management.

CERTIFICATIONS

- MongoDB – Associate Developer Certification.
- NPTEL – Responsible and Safe AI.

ACHIEVEMENTS

- Dark Pattern Buster Hackathon – Finalist, conducted by the Ministry of Consumer Affairs at IIT Varanasi (All India Level).
- Camp Senior – National Cadet Corps: Appointed as Camp Senior at the NCC CATC Camp held at Kongu Engineering College.
- Best in Training – National Cadet Corps: Awarded “Best in Training” for the training year 2024–2025 at Kongu Engineering College.
